Following these tips will assist Emergency Responders in locating your home or business when seconds count...

Homes and Businesses

- Address numbers should be large enough to be clearly seen from the road and set on a background of contrasting color. (preferably illuminated or reflective at night).

- If your address numbers can’t be seen from the road, attach numbers to an additional sign and place at the end of your driveway so they are easily seen from both directions.

- Mobile homes and apartments should also be identified with a number.

- If you live on a corner, make sure the house number faces the street named in your address.

Mailboxes

- Do not use your mailbox as the only means of identification for your home or business. Mailbox numbers can be confusing, especially if they are grouped together and there are multiple houses in close proximity.

- Put an address sign near your driveway to aid rescuers.

- Mark your mailbox on both sides. Make sure the numbers are in good repair and are of contrasting color that can be easily seen by approaching rescue vehicles.

- Keep clear of snow/ice in winter.

Address Signs

- Address signs of contrasting color should be placed close to your driveway entrance so they are easily seen by approaching rescue vehicles.

- Make sure they are located so they are not obstructed by snow in the winter or leaves in the summer.

- Reflective signs are the best and are available through the Waldoboro Fireman’s Association. (see attached order form.)

Unmarked or poorly marked addresses often cause response delays by Fire, Police and Emergency Medical personnel. Precious seconds are lost when rescuers have to search for your house number.
